Career Objective

To work as an active member in a team of professionals where I can apply my knowledge and acquire new skills for the betterment of an organization. I am an enthusiastic and detail-oriented Computer Science graduate with foundational knowledge in database design and data analysis. Eager to apply academic learning and technical skills to contribute to database management and data analysis projects. I am proficient in SQL Server, Power Bi WordPress (CMS) and Unity 3D Simulation.

TECHNICAL SKILLS: -

- Database Design and Normalization
- SQL, T-SQL Programming
- Query Optimization and Performance Tuning
- Data Analysis and Reporting
- Database Security and Access Control
- Backup and Recovery Strategies
- Project Management, Problem Solving and Analytical Thinking
- Data Definition Language (DDL)
- Data Manipulation Language (DML)
- Data Control Language (DCL)
- Transaction Control Language (TCL)
- Data Query Language (DQL)

Skills: -

- . MSSQL Database Management and DBA
- . MySQL
- . Unity 3D Programming & Simulation
- . WordPress (CMS)
- . Power BI / Data Analytics Skills

Work Experience: -

PHIBONACCI LEARNING PRIVATE LIMITED - MSSQL Server, DBA Developer and Unity3D Simulation Feb 14, 2023 - Present

- Developing Unity3D-based simulations
- MSSQL database development -:
- Power BI / Data Analytics Skills

1. Joins
2. Stored Procedures
3. Triggers
4. Views
5. Indexing & Performance tuning
6. Backup/Restore
7. Security (User, Roles)

PROJECTS: - Online Retail Database Management System

January 2024 – May 2025

- **Project Summary:** Developed a mini-Online Retail Database to manage customer information, order processing, and inventory control.
- **Technologies Used:** SQL Server, T-SQL
- **Key Responsibilities:**
 - Designed and created database schema, including tables and relationships.
 - Developed basic CRUD operations and implemented simple stored procedures.
 - Created ER diagrams to document the database design.
 - Analyzed and optimized slow-performing queries using execution plans and indexing strategies.
 - Implemented role-based access control to secure sensitive data.
 - Developed backup strategies, including full, differential, and transaction log backups.

Ditvi Export Pvt. Ltd. - Data analytic and Server Management

July 14, 2022 - Dec 20, 2022

- Client support, data manage and export-related queries

The Xceligent Technology - Software Sales and Marketing

Jan 1, 2019 - Apr 20, 2022

- Software sales and Marketing Strategies

Satisfaction Web Solutions Pvt. Ltd. – Website Development and Server

Management -

Feb 2, 2016 - Dec 25, 2019(Part Time)

- WordPress (CMS) and Server Management

Saraswati Gyan Peeth Higher Secondary– Mathematics Teacher

2014 – 2019(Full Time)

- Mathematics Teacher

EDUCATION: -

- Bachelor of Engineering (Computer Science) MITM, Ujjain - 2012 | Percentage: 67.7%

Personal Details: -

Date of Birth: 12-Sept-1989

Location: Ahmadabad

Contact: +91-7828019196

Languages Known: Hindi, English

Power BI / Data Analytics Skills

- Hands-on experience in Power BI for creating interactive dashboards and business reports
- Strong knowledge of data visualization, KPI reporting, slicers, drill-through, bookmarks, and dashboard design
- Experience in data cleaning, transformation, and modelling using Power Query
- Good understanding of DAX functions, calculated columns, measures, and data relationships
- Skilled in connecting multiple data sources such as Microsoft Excel, CSV, and SQL Server
- Developed sales, customer, and business performance dashboards with real-time insights
- Ability to analyse large datasets and convert raw data into meaningful business insights
- Knowledge of SQL queries, joins, stored procedures, functions, and database reporting
- Basic understanding of Python and AI-based data analysis for automation and reporting
- Experience in creating professional and user-friendly dashboards for business decision-making

Projects

Sales Performance Dashboard – Power BI

- Designed an interactive sales dashboard to track revenue, profit, customer insights, and sales trends
- Implemented KPI cards, line charts, pie charts, map visuals, and slicers for dynamic analysis
- Connected Power BI with Excel and SQL Server data sources
- Improved reporting efficiency and business visibility through data-driven insights

Business Analytics Dashboard

- Created dashboards for monthly sales tracking, regional performance, and customer analysis
- Used DAX calculations and Power Query transformations for advanced reporting
- Built interactive reports for management-level decision support 🚀
